

OCS equipment is developed and designed for the cost effective application of Odour Control Compounds

HIRE FACILITIES AVAILABLE

OCS H.P. Automicromist Spray System

Cost Effective Odour Control Atomising System

A fully automatic control centre, comprising Auto Mixing System, Dilution and Pumping Control Unit complete with Duty Stainless Steel Multistage Output Pump. All necessary pipework, atomising nozzles, connectors, filters etc. to complete the system. (Optional Duty/Standby Output pumps arrangement available).

The OCS H.P. Automicromist is designed and built to stringent standards for reliability and safety, whilst incorporating a number of unique features and benefits:

- Fully Automatic - chemical concentrate dilution and electronic dosing
- Fully Programmable Timer - as standard (7 day facility)
- Duty Stainless Steel Multistage Output Pump - for reliability
- Corrosion Resistant Spray Atomisers - for effective Odour Neutralisation
- Low Level Indicator/Shut Down - for mains water supply and pump protection
- OCS Electronic Wind Vane Control (Optional)

preserving the environment
