

Persnickety® Maskscents™ Deodorants for Odour Control

Three Highly Concentrated, High Quality Deodorant Formulations

persnickety®; n.

- Showing extremely careful treatment
- Fussy, fastidious

HAZARD DATA

PERSNICKETY MASKSCENTS formulations are non hazardous and biodegradable.

Consult individual M.S.D.S. for more information.

APPLICATION INFORMATION

Applications rates for all formulations are largely dictated by the intensity of the malodour to be covered. The precise application rate must be determined on site. Standard dilution rates given above should be used as a starting point. Intensity variations on site occur and thus application rates may need periodical adjustment.

All formulations are supplied in concentrated liquid form and are diluted with clean water before application.

Chances are you have dealt with the question “What is that smell?” more times than you care to remember. Not all that long ago, nuisance odours were considered unavoidable unpleasantities we just had to bear.

But no more! Public intolerance of malodour has grown dramatically. Regulatory pressure is rigorous and it's a good bet that you have tried and discarded many proposed solutions, PERSNICKETY® MASKSCENTS™ can provide an efficient and economic answer to temporary, 'light-duty' odour emissions.

PERSNICKETY® MASKSCENTS™ - are effective and appropriate for less severe levels of malodour. Their effectiveness is enhanced over competitive products by the incorporation of viscosity modifiers which provide for finer atomisation and longer suspension in air, resulting in more effective distribution of the desired residual perfumed effect.

PERSNICKETY® MASKSCENTS™ - do not alter the character intensity of malodours. Rather they add pleasant, residual fragrances so that the impact of the malodour is relatively weak in relation to the overall perfumed effect.

PERSNICKETY® MASKSCENTS™ - are available in 3 highly concentrated, high quality, low cost formulations:

PRODUCT CODE	DESCRIPTION
OCS/PFR	'Powerfresh' is an extremely powerful compound which has become our most popular MASKSCENT . Standard dilution with water 1:100*
OCS/MFR	'Melonfresh' provides a very appealing air freshened effect with a fresh melon end note. Standard dilution with water 1:100*
OCS/PFR	'Pinefresh' is a superconcentrated compound which as its name implies, provides a fresh pine fragrance when sprayed as a working solution. Standard dilution with water 1:250*

*Can be safely used stronger

preserving the environment
